

New 'Reports Center Option' for Print Manager Plus 2010® Brings Cloud Computing to Printing Management

Report Generation and Access Never Got Easier

Palo Alto, California, Tampa, Florida and London, England -- July 12, 2010 -- Print Manager Plus 2010 Reports Center Option enables companies to fully access, control and edit reports securely right over the web. This new option also provides auto importing, auto emailing, scheduling, report and graph generation and many more features further increasing print cost reduction – up to 75% for businesses, libraries and educational institutions worldwide.

Increased, fully secure access and easier management enable companies and organizations of any size to fully manage their network-wide printing on all brands of printers, control all print traffic and effortlessly manage all of their printing resources and printing budgets – throughout their network without resorting to expensive, complex and inferior hardware or other partial software solutions.

Now fully compatible with the new Microsoft XPS® format. Print manager Plus 2010 and the new Reports Center Option provide users with higher quality documents, much easier print management and higher print cost savings. “With the addition of our new Reports Center Option and full auditing of Microsoft XPS file capability, Print Manager Plus remains on the cutting edge of Print Management technology,” said Software Shelf CEO, Bill Feeley.

The only fully functional, secure – all software solution available today, Print Manager Plus 2010 supports all printers, plotters and multifunctional devices on the market today and monitors printing on all Microsoft, Macintosh, Unix, and Linux operating systems – and it does so at a fraction of the cost of any other IT product available.

Print Manager Plus is also a Green product featured by 'Guide Me Green' as “software that is saving 150,000 trees every month due to the paper savings it achieves for its customers.”
